**ON THE METHODOLOGY OF PRACTICAL
LESSONS «INFLAMMATORY DISEASES OF
LIPS – CHEILITIS»**

ABSTRACT. The article presents the guidelines of the practical lessons on one of the topical issues of therapeutic stomatology – inflammatory lip diseases. The article is focused on completeness, consistency of clinical and laboratory examination of patients with cheilitis with subsequent analysis, generalization of identified symptoms and justification of the preliminary diagnosis as well as on the consistency of the differential diagnosis and administration of an effective comprehensive treatment.
